ELGi
 Always Better.

About Us

For nearly 30 years our reputation has been built on quality and the ability to provide tailor-made solutions for local businesses. In dealing with client's complete compressed air turnkey solutions, we are able to utilise our specialist industry and technical knowledge to offer in-house servicing.

We offer:

- Free no obligation on-site assessment and quote.
- Strong relationships with industry leading suppliers both locally and internationally.
- Full supply, installation and service.
- Innovative solutions.
- We can design your pneumatic automation, supply all the parts, install it, maintain it with AirCare and repair it.
- Air compressors & equipment
- Pneumatic controls
- System automation
- Full design and build service for all specialty project work.
- We service all brands and only sell the best.

John Guest®

Industrial Air Compressor Maintenance

Compressed Air Controls has serviced, maintained and supplied industrial air compressors for nearly 30 years.

When servicing your compressor(s) and auxiliary equipment we will be providing the following:

- Experienced service staff
- 24 hour support 7 days per week
- Quality service kits and parts
- Site and service reporting

Compressed Air Controls service management database provides:

- Reports at your request. Bearing vibration, oil analysis, historical services, etc.
- Continuity from all our staff on customer sites and equipment
- Itemised service report (itemised invoice too!) 100% transparency
- Automatic equipment scheduling

Compressed Air Controls staff are:

- Experienced in site servicing of most compressor brands
- Trade qualified
- Site Safe certified
- Well supported with technical and management structures
- EECA Air Efficiency Rated

Compressed Air Controls Service Vehicles have:

- Consumable parts, tube & fittings
- Solenoid valves
- Filters, lubricators, pressure regulators & gauges
- Specialised tools required

Our objective is to provide quality services to maintain all compressors and equipment.

A one trip objective to prevent return trip for parts etc reduces costs to our customers and with our professional approach our customers have peace of mind in knowing workmanship parts and service are of a high standard.

Please feel free to request a site visit for us to establish your exact requirements.
